**Subject:** FW: Jefferson County Board of Elections

Do you think you can update Easy Vote to document the seals now in place on these units?

Michael,

These are the BMD serial numbers that I took the State of Georgia Seal from by mistake.  
I have the seals but I am unsure of the serial number which SOS seal came off.

BMD      New Seal

# 270870 - 0783766  
# 300492 - 0582158  
# 300494 - 0373662  
# 171100 - 0783758  
# 300493 - 0783743  
# 171101 - 0119665  
# 300495 - 0582162

Seal numbers that were removed:

307303; 307305; 307330; 307367; 307370; 307713; 356953

Sorry for my error,  
Thank you for all your help and all you do for us!

No, just please put your own seal on the equipment and document the seal number attached.

*Michael,*

*My tech is doing L&A testing and discovered that 2 of our BMDs Election Data Seals were missing, (poll workers). Do we need to send these back to be resealed ? If so my regional tech has offered to take them back to Atlanta and drop them off on his way back home. Please let me know what we need to do.*

Yes, that is possible to set the ICC up that way. You would need to copy the data to an external drive and then upload into RTR (Results Tally and Reporting).

Do you want me to respond to Nancy or would you like that to come from your office?

Scott,

**Exhibit**  
**0005**

I talked to Nancy about this. Does the central scanner have to be hooked up to EMS when scanning? She asking about scanning the absentee ballots in her office and taking that data to upload to the EMS in a separate location.

Hey Chris and Scott,  
Sorry to bother you – but I need some help.

We have our main office, which is where we conduct day-to-day operations and send out/receive absentee ballots. Then we have a warehouse about 12 miles away where the EMS and all of our equipment is stored.

Can I have the ICC (computer/scanner) setup in our main office and then transport election tallies out to the warehouse on election night once complete?

Thank you,

Nancy L. Gay
